

TAKE 3D PRINTING TO THE NEXT LEVEL WITH THE

MakerBot Method

Experimental Extruder &

ColorFabb Material Bundle

The new LABS GEN 2 Experimental Extruder allows you to print more abrasive 3rd-party composites and polymers for longer thanks to upgraded hardened-steel components.

Amtek Company's **MakerBot Method Experimental Extruder & ColorFabb Material Bundle** lets you take full control of your 3D printing experience with a customizable hardware design and four interchangeable nozzles to tackle multiple materials from colorFabb.

Quickly swap between a model extruder for highly repeatable, dimensionally accurate parts with MakerBot Materials for dozens of verified third-party material options and unlimited open-materials experimentation.

The MakerBot Experimental Extruder & Material Bundle includes:

- 1 x 900-0054B – MakerBot LABS GEN 2 Experimental Extruder
- 4 different nozzles
- 2 x ColorFabb copperFill Filament Spool
- 2 x ColorFabb bronzeFill Filament Spool
- 2 x ColorFabb corkFill Filament Spool
- 2 x ColorFabb woodFill Filament Spool
- Shipping
