

eSports Labs

By harnessing students' interest in eSports, you can engage students in extracurricular pursuits, and channel their energy into STEM fields, media and other career paths or postsecondary education opportunities.

Up your game with the leading AR/VR and gaming technology, computers, spectator seating, judges panels, "war rooms" and more.

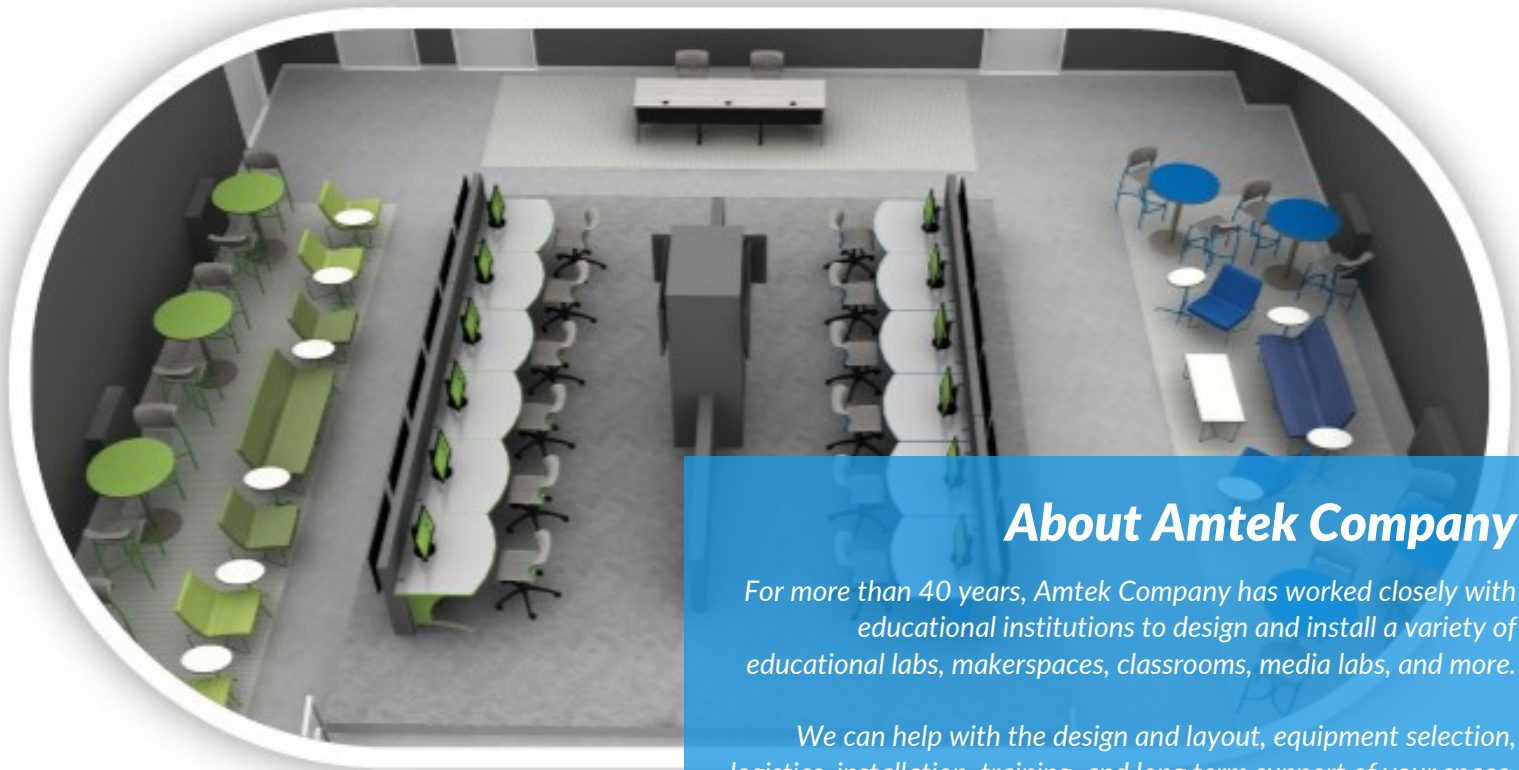

Level up your lab with a custom designed space unique designed to meet your students' needs. Enlist custom cabinets to house wiring and monitors, carefully plan cable and data considerations, and create a space that fosters creativity and inspires students.

Experience uncompromised performance and speed with 11th Gen Intel® processors and NVIDIA® GeForce RTX™ 30 Series graphics cards. See every glorious detail on its 15.6" PANTONE® Validated 4K Ultra HD narrow bezel display. Stay cool and keep things quiet with strategically placed high-efficiency fans and the latest thermal cooling technology. Run any game with both Unity and Unreal engines built in. Unleash the possibilities...

About Amtek Company

For more than 40 years, Amtek Company has worked closely with educational institutions to design and install a variety of educational labs, makerspaces, classrooms, media labs, and more.

We can help with the design and layout, equipment selection, logistics, installation, training, and long term support of your space. And with our state contracts, we simplify the ordering process.

Consultation & Layout Design

We provide complementary upfront consultation and layout services.

Installation & Training

Factory certified technicians assist with a wide variety of technologies and software.

Continuous Customer Support

One phone number to call for any support issue that arises.
